

Cancer Risk Factor for Example Report Age 71 and PSA 6 for ERSPC Risk Calculator Results

Confirm that you are interested in an Age 71 and PSA 6 example screening strategy report.

Run the online ERSPC risk calculator for your calibrated and adjusted PSA and other variables

On the table below, circle your ERSPC-RC significant cancer risk % and highlight the column below.

On the table below, circle your ERSPC-RC detectable cancer risk % (or mid-point) and highlight the row to the right.

Read your cancer risk factor at the intersection of the highlighted row and column of the table.

Use that cancer risk factor to choose the nearest example report cancer risk factor (1X, 2X, 3X, 4X).
